**LAWNMOWER & OUTDOOR
POWER EQUIPMENT RANGE**

2016/2017

“IT’S NOT JUST A LAWNMOWER, IT’S A MASPORT!”

INDUSTRY BEST CONSUMER WARRANTIES

With Masport it will last, we guarantee it.
MASPORT HAS YOU COVERED.

Masport is committed to quality and performance. We back our products. On offer is a full comprehensive warranty, so you know exactly what is covered.

Depending on whether your mower is a steel or aluminium chassis and the type of engine your mower has, there’s a warranty cover tailored specifically for your new purchase.

We offer you an impressive 6 years warranty on all aluminium chassis. If you prefer a steel chassis you’ll enjoy 4 years peace of mind. Both aluminium and steel options come with either a 2 year warranty on ALL parts and engine, or a 4 year warranty with an I/C engine. Plus a LIFETIME HDPE plastic catcher warranty.

Every lawn is different which is why Masport has developed a comprehensive range of lawn and garden equipment. Masport mowers have been designed to meet the needs of the heaviest lawn conditions and the longest mowing times, therefore they are built to last. The models in the Masport range are feature rich, innovative and truly high performance mowers. Regardless of whether you see taking care of your lawn as a pleasure or a chore, Masport has the equipment to help you realise your vision, while suiting your lifestyle and budget.

Proudly designed and engineered in New Zealand and sold all around the world.

OUR 4+ YEAR LAWNMOWER WARRANTY

The Masport lawnmower range fitted with IC engines combines the benefits of top quality Masport lawnmowers, with Briggs & Stratton Industrial Commercial grade engines. Masport lawnmowers with this engine carry a minimum 4 year warranty - (Conditions apply, see www.masport.co.nz for more information).

**Masport unique features powered by a commercial grade engine...
YOU CAN’T GO WRONG!**

THE ALUMINIUM ADVANTAGE

Masport has been producing lawnmowers with aluminium chassis for over 50 years. You can probably still find one of these earlier mowers today tucked away in the back of a garage, collecting dust with a worn out engine, but a chassis that is still intact.

Masport is so confident about the longevity and rust free advantages of its aluminium chassis, that we offer a comprehensive 6 year warranty.

BRIGGS & STRATTON STARTING PROMISE

Briggs & Stratton 500, 550, 650, 675, 700, 725, 750, 850 series engines include a Starting Promise as listed. If they don’t start in line with the starting promise, return it to an authorised Briggs & Stratton engine service agent, and they will fix it for free**.

These engines will always start with a maximum of 5 primes and 4 pulls or it is fixed for free**.

With ReadyStart™, there’s no need to manually prime or choke the engine on your mower, even from a cold start. Now even the least experienced lawn mower user can confidently start their mower. This engine should start on one or two pulls or it is fixed for free**.

** conditions apply, see www.masport.co.nz for more information.

EASIEST STARTING EVER

Briggs & Stratton's InStart™ lithium-ion electric start engines, take the guessing game out of starting your lawnmower. No more priming, choking or pulling the rope. The first engine to combine the power of petrol and the starting reliability of lithium-ion battery technology. By combining the easiest starting engine with the easiest to maintain engine, Briggs & Stratton is introducing their easiest engine. Ever!

THANKS

A big thank you to the generations of Kiwis who continue to make Masport the most popular Gardening Equipment brand.

We here at Masport are humbled to have won the Gardening Equipment category every year since its inception in 2012.

We pledge to continue to bring innovation, world-class standards and a vast range of choice to you and future generations!

‘5 TICK’ STANDARDSMARK™

Masport President® lawnmowers carry the ‘5 Tick’ StandardsMark™, a global certification mark providing assurance that the manufacturing facility and product produced carrying this mark have undergone a rigorous independent audit and testing programme, facilitating the reliability, quality assurance and safety of these products. The 5 Tick product certification applies specifically to petrol powered rotary lawnmowers within this document.

MASPORT FEATURES

The Masport Silver series offers a range of mowers to suit your needs, lifestyle and budget and will help you achieve that perfect lawn. The models in this range are feature rich, innovative and truly high performance mowers.

HANDLE SYSTEM

Handle Lift System

Foot pedal release for quick easy handle re-positioning. Makes catcher access and storage very easy.

(See over the page for more detail).

PVC Grip

For added comfort and hard-wearing during operation.

Soft Grip

For superior comfort and less vibration during mowing.

MSV Handle

Wide diameter, with soft grip for added comfort.

Lower Handles

One Piece

Reinforced lower 'U' handle for added strength.

Two Piece

Stub handle with no middle bar for easy catcher access.

Camlocks

Cam locks snap open for quick and easy handle fold down.

MOWER STARTING

Zone Start

The conveniently positioned starter cord eliminates the need to bend all the way down to pull-start, reducing the risk of back strain.

WHEELS

Adjustable Dual Bearing Wheels

Masport's ball bearing wheels make the mower easy to push and, with a threaded axle and nut, the wheels can easily be adjusted if they become loose after significant use.

MASPORT BLADE SYSTEMS

Masport Quickcut® 2 Swingback Blade System

For superior cutting, mulching and catching performance, Masport mowers are fitted with unique blade cutting systems. The Masport Quickcut® blade is a top quality, specially designed blade system for cutting and mulching.

Masport 2 & 4 Blade Disc System

This blade system runs 2 or 4 swing back blades suitable for catching and mulching applications and is fitted on selected Masport Silver catching and mulching models.

Masport Quadcut® 4 Blade Disc Cutting System

Masport mowers such as the MSV® are fitted with a specially designed four blade disc system, great for catching due to increased airflow.

Masport Quadcut® with Chipper Blade

The additional chipper blade allows your mower to chip branches up to 35mm / 1 3/8" into garden mulch, when fed through the mower via the Chipperchute.

All these blade systems have a swingback feature, designed to protect the crankshaft from damage should the mower hit a solid object.

CUTTING HEIGHTS

Masport Push lawnmowers have a range of cut heights, from 10mm-70mm (3/8" - 2 3/4") and come with single point one touch height adjusters.

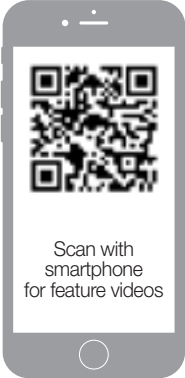

CUTTING CHASSIS

High-arch design - allows airflow created from the blades to suck the grass upwards for multiple cut cycles before flowing into the catcher, creating enhanced mulching and catching performance.

	STEEL	ALUMINIUM
16.5" Chassis <ul style="list-style-type: none">Smaller cutting chassis for smaller lawns or tricky grass areasEasy to manoeuvre	✓

21" Chassis <ul style="list-style-type: none">High-arch designExtra cutting width suitable for large areas or getting the job done fasterDual Mowzone®	✓	✓

* Please note, not all mowers in our range contain all of these features.

THE MASPORT ADVANTAGE

- 2'N1** Combination 2'N1 - **catch** and **mulch** options on these mowers
- 3'N1** These mowers have a combination of catch, mulch & **side or rear discharge** options.
- Genius 4'N1** These mowers have a combination of catch, mulch, side discharge & **chip** options.

WASHPORT

Hose fitting point on the chassis to clean the chassis while the mower engine is running, increasing the life of the chassis and improving cutting efficiency.

HANDLE LIFT SYSTEM

The Handle Lift Sytem allows you to quickly and easily access the catcher (or Smartchute® system). Simply step on the foot pedal and lift the handle, it's that easy! Once the handle is returned to the operating position, it will lock in firmly providing responsive handling. It is very effective as a space saver when storing the mower.

SELF PROPELLED

Let the mower do the work. These models are fitted with a self drive system. All you need to do is squeeze the self propelled bail to the handle to propel the mower forward. Reduce pushing effort and make mowing your lawn quick and easy with Self Propelled mowers!

CHIPPERCHUTE

The Masport Chipperchute is an innovative development in lawn mowing that means your mower can do more than cut grass. The Chipperchute actually shreds branches up to 35mm (1 3/8") in diameter using the additional chipper blade and turns them into useful mulch. As branches are chipped, the chips are fed back into the catcher so you can put the mulch into your compost or garden.

PATENTED

REAR DISCHARGE

With the rear discharge chute, the mower can be used effectively without a catcher. It is designed to work with Masport's effective high-arch chassis. The flap distributes the grass out of the rear of the machine and spreads it more evenly.

SMARTCHUTE®

Mow without the catcher and avoid the messy grass clumps. The Masport patented Smartchute® will side discharge a clean spread of clippings as you mow to leave your lawn looking wonderful. Just engage the unique feature and begin mowing.

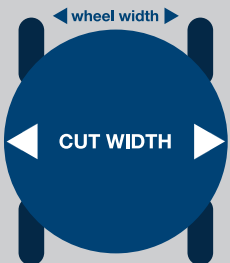

PATENTED

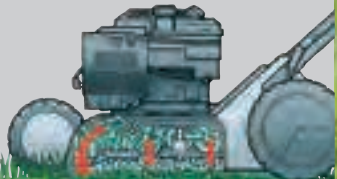

MASPORT DUAL MOWZONE®

With the blade coverage extending beyond the wheel width on both sides, the mower can cut closer to walls, kerbs and fences, giving a cleaner finish to your lawn.

MULCHING

When you mulch there is less weight to push and no stopping to empty the catcher. The high-arch chassis design and the special blade means it also naturally recycles your grass by re-cutting the clippings and feeding them back into your lawn. You will save on watering, lawn fertilisers, as well as time.

KEEP IT RUNNING

Lawnmowers are built to last. However, maintenance can be the difference in ensuring that your investment lasts a lot longer. Your dealer can advise you of an appropriate schedule to get the most out of your new purchase. Also, to ensure your mower performs as it should and that you are covered by your manufacturer's warranty, we recommend you buy your spare parts from an authorised dealer and only use genuine Masport parts.

A tip on ordering spare parts like new blades from your dealer outlet - you will need to supply:

- Model name and serial number
- Year of purchase

Other Masport accessories available from your local dealer include oil and fuel cans.

GETTING IT GREEN

The perfect lawn is the source of pride and envy to many. It can set off your house and your garden to its best advantage and also provides the perfect area for children to play and adults to sit back and enjoy the scenery.

WATERING

Lawns should be watered in the morning rather than the evenings. For best results, thoroughly water your lawn regularly.

FERTILISING

Regularly and lightly fertilise your lawn during the growing season. This will achieve better results than infrequent heavy fertilising. Use a correctly balanced fertiliser.

MOWING

Be careful not to cut your lawn too short and 'scalp it'. Grasses need the leaf blade to make food for themselves. Also don't mow your lawn when it's too hot or too wet. Remove lawn clippings or use a mulching mower. Keep the blades sharp and clean the mower after use.
