

2016 BATTERY SERIES

A woman wearing safety glasses, a black long-sleeved shirt, and orange safety pants is using a chainsaw to cut through a dense vine-covered fence. The chainsaw is orange and black. The background is filled with green foliage.

PETROL PERFORMANCE

BATTERY CONVENIENCE

We've been working with professional users for more than 50 years. This experience and knowledge – in combination with pioneer thinking and first-class engineering – has given rise to a number of innovative machines. Machines that help forest workers and landscapers as well as landowners and garden enthusiasts solve their daily challenges. We're now adding a new chapter in our history of innovations – the Husqvarna Battery Series.

What you get. And how we do it.

Lasting power.

The Li-ion 36V batteries provide long lasting power and top class performance. They are equipped with a cooling system, which extends the battery cells lifetime and lets you work in high temperatures.

Simple operation.

Smart and intuitive, the battery machines are operated using an interactive keypad. You start and stop the machines easily by pushing a button.

Longer operation.

When conditions aren't on the tough side, choose the SavE™ mode on the intuitive keypad for maximised runtime with great results.

Convenience.

The 36V Li-ion battery pack is designed for demanding, long lasting use and fits all* of our machines, allowing you to quickly switch the same battery between equipment and just keep on working.

*Chainsaw models always require BL150 battery. Blower model 536L1BX suits back-pack battery only.

Consistent torque.

Our in-house developed, advanced brushless motor[^] is 25% more efficient than a standard brush motor. This means that the motor provides high and consistent torque for maximum performance.

[^] Brushless motor applicable to 500 series models only.

Low maintenance.

No refilling of fuel, less parts to service and an electronically controlled drive system means less downtime and low operation costs.

Comfortable operation.

Our battery machines have a compact, slimmed-down design, exceptional product balance, comfortable handle grips and intuitive controls allowing you to work comfortably in all situations.

Quiet operation.

The low noise levels provides a comfortable work situation and low disturbance for others, enabling longer working hours and the possibility to work in noise sensitive and restricted areas.

IMPORTANT INFORMATION

Husqvarna conducts continuous product development and reserves the right to change designs, specifications and equipment levels without prior notification. Always read the instructions carefully before use, as products with moving parts can be dangerous if used incorrectly. All images in the catalogue are for illustrational purposes only. All technical data was current at the time of printing, however these may change as a result of further product development. Product availability, standard features and equipment may vary from market to market. Optional equipment may be purchased at an additional cost. Please check with your local authorised Husqvarna Servicing Dealer for products recommended and approved in your market.

C Commercial
Extreme Duty -
All day, every day use.

L Landowner
Heavy Duty -
Frequent or demanding use.

H Homeowner
Medium Duty -
Seasonal or occasional use.

PURE POWER, NO COMPROMISE

It's possible to perform without fuel. Husqvarna's battery chainsaws are highly efficient with a powerful 36V Li-ion battery, which combined with a specially developed motor, gives you performance similar to our petrol chainsaws. The Husqvarna developed motor provides high chain speed and excellent cutting performance. The intuitive keypad enables starting and stopping at the push of a button, while the savE™ mode button maximises run time. In short – a very quiet, efficient and lightweight chainsaw at your service.

▶ Check out the top performance of Husqvarna's Battery Chainsaws

▶ See through hand guard / Chain brake

▶ Low noise

▶ Felling marks

▶ Smooth throttle control

▶ Battery charge indicator

▶ High chain speed

▶ Metal spikes

▶ Low Vibrations

▶ Flip-up cap / visible oil level

▶ Angled front handle

INTUITIVE KEYPAD

The intuitive keypad delivers an instant push button start, making these chainsaws extremely easy to start and stop. The design also ensures the chainsaws do not switch on accidentally.

MAXIMUM RUN TIME

Choose savE™ mode for maximum run time.

PERFECT ERGONOMICS

The chainsaws feature a light weight design and are exceptionally well balanced, ensuring perfect ergonomics in all working conditions.

FLIP-UP OIL TANK CAP

The flip-up oil tank cap is easy to open and close, while the transparent oil indicator makes it easy to monitor chain oil levels.

COMPLETE NEW RANGE!

H 136Li*

36V - 12" bar - Chain pitch 3/8" - 4.9kg with BLi150 Li-ion power, Instant start, Low noise, SavE™ mode, Inertia-activated chain brake, Tool-less chain tensioning, Flip-up oil tank cap. Ideal for around the garden.

*Available from April 2016.

C 536LiXP

36V - 14" bar - Chain pitch 3/8" - 3.9kg with BLi150 Li-ion power, Instant start, SavE™ mode, Inertia-activated chain brake, Brushless motor, High chain speed, Flip-up oil tank cap. Perfect for professional cutting applications.

C T536LiXP

36V - 12" bar - Chain pitch 3/8" - 3.7kg with BLi150 Li-ion power, Instant start, SavE™ mode, Inertia-activated chain brake, Brushless motor, High chain speed, Flip-up oil tank cap. Top class tree climbing saw.

"It was just as fast as a petrol saw if not faster to bring the tree down".

"After a recent product demo of the latest range of Husqvarna chainsaws there was one product that really caught my attention. It was their battery powered top handle climbing saw. I have been in the power-line vegetation clearing industry for 11 years and this was my first experience with a battery powered saw, so you could imagine I was a bit reluctant to believe that it was possible for a battery powered saw to be able to handle the type of work that we do in the field. But this product blew me away by how good it was. I was able to witness it being used from a cherry picker and cut down a tree in the same fashion that we would with a petrol powered saw but without the noise smoke and fuel top ups associated with 2 stroke saws. It was just as fast as a petrol saw if not faster to bring the tree down, because there was no stalling and no need to constantly be pull starting the saw each time you turn it off to talk to ground crews below. Very impressive product. I would love to own one and have them as standard equipment on all our vehicles".

Dylan Britton - Cutting Field Supervisor, Kyneton VIC - Vemco Group

Weight (Incl. BLi150 battery)	4.9 kg	3.9 kg	3.7 kg

SOUND AND VIBRATION LEVELS

* Equivalent sound pressure level, as per ISO 22868, is calculated as the time-weighted energy sum for the sound pressure levels at various operational states. Typical variation for equivalent sound pressure level is a standard deviation of 1 dB(A).

** Equivalent vibration level, as per ISO 22867, is calculated as the time-weighted energy sum for the vibration levels at various operational states. The data presented for equivalent vibration level has a typical variation (standard deviation) of 1 m/s².

HIGH CHAIN SPEED

The Husqvarna developed motor delivers high chain speed for fast, smooth cutting performance.

EFFICIENT BRUSHLESS MOTOR

Our in-house developed, advanced brushless motor is 25% more efficient than a standard brush motor. This means that the motor provides a high and consistent torque. Featured on models 536LiXP and T536LiXP.

CHAIN BRAKE

All Husqvarna chainsaws are built with inertia-activated chain brakes, so if a kickback occurs and the tip of the bar is forced upwards, the inertia of sudden movement will activate the chain brake instantly.

BELT EYELET

The horizontal eyelet makes it quick and easy to connect the saw to the climbing harness - a big advantage when using the saw high up in a tree. Featured on model T536LiXP.

MORE CLEARANCE, LESS DISTURBANCE

Silence is golden. With a Husqvarna battery grass trimmer, silent operation comes standard as does high performance. Our quiet, lightweight, balanced and easy-to-use battery driven grass trimmers will get the most demanding tasks done. They feature Lithium-ion batteries, which deliver unsurpassed, long-lasting power and come in a range of capacities. The ergonomic handle designs provide the best working position and the savE™ mode ensures longer runtime, so you get more work done with less disturbance.

Engineered for maximum performance.

Husqvarna trimmer line has been engineered to ensure maximum performance during operation. Specifically formulated resin improves strength and cutting performance. The premium line is shaped to reduce noise and allow for level flight.

NEW!

NEW Trim Force™ Trimmer Line

Commercial grade co-polymer pentagon shaped orange string trimmer line with great cutting performance, reduced breakage and welding. Fits all standard trimmer heads.

▶ Watch the Husqvarna Battery Trimmers and Brushcutter in action.

INTUITIVE KEYPAD

The intuitive keypad delivers an instant push button start, making these machines extremely easy to start and stop. The design also ensures the machines do not switch on accidentally.

MAXIMUM RUN TIME

Choose savE™ mode for maximum run time.

PERFECT ERGONOMICS

The trimmers and brushcutter are light weight and comfortably balanced ensuring excellent ergonomics. The high handle bar featured on model 536LiRX increases freedom of movement when working on slopes.

TAP 'N GO™ TRIMMER HEAD

Trimmer line is fed automatically when the trimmer head button is tapped on the ground. The user has total control of the line feed.

COMPLETE NEW RANGE!

H 136LiL

36V – 33cm Cutting width - 3.9kg with BLi80.

Li-ion power, Instant start, Low noise, SavE™ mode, Adjustable front handle, Telescopic shaft. Ideal for around the garden.

C 536LiL

36V – 40cm Cutting width - 4.3kg with BLi150.

Li-ion power, Instant start, Low noise, SavE™ mode, Two-way rotational trimmer head, Brushless motor, Tap 'N Go™ trimmer head. Perfect for professional applications

C 536LiRX

36V – 40cm Cutting width - 5.1kg with BLi150.

Li-ion power, Instant start, Low noise, SavE™ mode, High handle bar, Comfortable harness, Two-way rotational trimmer head, Brushless motor, Standard equipment: Tap 'N Go™ trimmer head, 3-Tooth grass blade, Balance 35 harness. Designed for professional clearing applications.

ADJUSTABLE HANDLES

Easy to adjust handle ensures better control and comfortable use.

EFFICIENT BRUSHLESS MOTOR

Our in-house developed, advanced brushless motor is 25% more efficient than a standard brush motor. This means that the motor provides a high and consistent torque. Featured on models 536LiL and 536LiRX.

TWO-WAY ROTATION

The rotational direction of the trimmer head can be changed for less grass on walk ways. Featured on models 536LiL and 536LiRX.

TELESCOPIC SHAFT

The telescopic shaft makes it easy to adjust the product length to ensure the perfect working position for individual users. Featured on model 136LiL.

HIGH PERFORMANCE, LOW NOISE

Working on battery power with a Husqvarna battery hedge trimmer will not slow you down. Our hedge trimmers are ideal for all jobs around the garden - regardless of whether your hedge is small with eye catching detail or a tall and lush masterpiece. You will be able to work as long as you need to, whenever you need. The long, precision sharpened blades and high cutting speeds will deliver top class results with every cut. Husqvarna battery hedge trimmers will always provide strong performance and long lasting power in a trouble-free way.

▶ *Trims to perfection, time after time.*

INTUITIVE KEYPAD

The intuitive keypad delivers an instant push button start, making these Hedge Trimmers extremely easy to start and stop. The design also ensures the machines do not switch on accidentally.

MAXIMUM RUN TIME

Choose savE™ mode for maximum run time.

WELL BALANCED

Our machines have a compact, slimmed-down construction with the front handle close to the centre of gravity, making them lightweight and well balanced – allowing you to work comfortably in all situations.

ERGONOMIC HANDLE

Ergonomically shaped handle for greater comfort and easy access to the controls.

PIVOTING REAR HANDLE

The pivoting rear handle featured on model 536LiHD60X makes it easier to manoeuvre when cutting both vertically and horizontally.

EFFICIENT MOTOR

Our in-house developed motor provides a high and consistent torque.

DURABLE GEARBOX

Durable gearbox in aluminium for efficient cooling and long product life.

LOW MAINTENANCE

No refilling of fuel, less parts to serve and an electronically controlled drive system means less downtime and low operation costs.

PETROL POWER, BATTERY INNOVATION

Can a battery blower really be as effective as a powerful petrol driven machine? The short answer is yes. Our battery blowers are driven by innovative battery technology that not only delivers high performance, but also has a low noise level, class leading ergonomics and usability. A Husqvarna battery blower can be used both outside and for indoor tasks, such as clearing litter. It has perfect balance, an instant start, cruise control and boost power mode that gives a little extra power when its needed most.

Best performance in the professional battery class due to the advanced electric motor fan design.

EFFICIENT BRUSHLESS MOTOR

Our in-house developed, advanced brushless motor is 25 % more efficient than a standard brush motor. This means that the motor provides a high and consistent torque.

LOW NOISE LEVELS

Low noise levels enable longer working hours and the possibility to work in noise sensitive and restricted areas.

THE POWER SOURCE BEHIND IT ALL

The Husqvarna Battery Series give you petrol performance thanks to a uniquely powerful 36V Li-ion battery system for all hand-held products. Throughout the operation time, you get high and constant power. The quick-start charging system features active battery cooling after use, which shortens the charging time and the intelligent charging power management monitors each individual battery cell to guarantee an optimized charging process. All this combines to ensure less down-time and more productive work time.

- 

Recharge at any time.
There is no memory effect. You can recharge at any time, even partly empty batteries.
- 

Intelligent discharge management.
Protects from deep discharge and assures extra long lifetime.
- 

Push button indicator.
Simply push the button on the side of the battery to get an instant reading of the current state of charge.

CHARGER THAT SETS A NEW STANDARD

Husqvarna Battery Series not only introduces something new in terms of performance – but also in terms of fast charging. Equipment with two batteries, you can keep working non-stop since the charging time is shorter than the working time, 4.2 Ah ~ 35 min (80% charged).

- 

Quick-start charging system.
Active battery cooling after use shortens the recharge time.
- 

Intelligent charging power management.
Each individual battery cell is monitored to guarantee an optimized charging process.

FOR THE BIGGEST TASKS - BATTERY BACKPACK

Gives you enough power to get the job done without recharging.

BLi520X	BLi940X
14.4 Ah = ~up to 6 hrs of continuous run time	26.1 Ah = ~up to 10.5 hrs of continuous run time
7.1 kg	7.9 kg

WHY CHOOSE BATTERY?

HEALTHIER WORK
No direct emissions or exhausts.

LOW NOISE LEVEL
Suitable for noise-sensitive areas
- hospitals, parks, etc.

LOW VIBRATIONS
Provides less fatigue for a longer working time.

LOW MAINTENANCE
Thanks to the electric drive system.

HUSQVARNA BACKPACK BATTERY

Up to a full day's work in one charge.

We have designed the new Husqvarna backpack battery to be among the most comfortable and ergonomic on the market. The capacity is up to 10 times higher than the integrated battery, providing more hours of work between charges.

CLEAN OPERATION
No fuel required.

ALL WEATHER USE
Come rain, hail or shine.

INTUITIVE START
Simple user interface - if you can start one, you can start them all!

PETROL PERFORMANCE
Petrol performance with battery convenience.

HIGH PERFORMANCE

LOW RUNNING COSTS

Husqvarna's battery series powers a broad range of tools. All equipment works with the same battery pack, giving you full flexibility to suit your individual needs. The integrated battery provides high capacity in a small package, while the comfortable backpack batteries provide up to 10 hours of runtime between charges. Less downtime means improved productivity and profitability.

INTEGRATED BATTERY PACK

The Li-ion battery provides long lasting power and top class performance. The integrated air duct prevents overheating and the convenient battery indicator provides a clear indication on the battery status, making it easy to see when charging is needed.

967 24 18-01	BLi80
967 24 19-01	BLi150

BACKPACK BATTERY

The large Li-ion battery backpack is among the most comfortable and ergonomic on the market. The capacity is up to 10 times higher than the integrated battery, providing more hours of work between charges.

966 77 59-01	BLi520X
966 77 60-01	BLi940X

BATTERY CHARGER - QC330

Husqvarna battery charger for Li-ion batteries that provide fast and smart charging. Suits BLi150, BLi520X and BLi940X batteries.

966 73 06-01

BATTERY CHARGER - QC80

Battery charger for Li-ion batteries providing convenient charging for the BLi80 and BLi150 batteries.

967 33 56-71

BATTERY BAG

Insulating, splash water-proof and shock-absorbing bag for Husqvarna BLi batteries. Features a thermo coating which keeps the appropriate operating temperature of the battery even under very cold or hot climate conditions. Easy to carry with both belt-loop or hook for arborists. Suits BLi80 and BLi150 batteries.

585 37 18-01

BATTERY BOXES

Box for the safe transport and storage of Husqvarna batteries, chargers and other accessories. Fully compatible with the Systainer-Box-System.

585 42 87-01	Small - Suits BLi80 & BLi150 batteries.
585 42 88-01	Large - Suits BLi80, BLi150, BLi520X & BLi940X batteries.

From weapons to battery products, three centuries dedicated to innovation.

Before battery products, Automower®, market leading chainsaws and trimmers, Husqvarna was a Swedish company built to manufacture weapons for the army. Since starting out in 1689, Husqvarna, now part of the Husqvarna Group, has manufactured a wide range of quality products including, motorcycles, stoves, and sewing machines.

Competing in a wide range of markets, Husqvarna's excellent engineering skills and passion for quality products, has led to innovative solutions that have stood the test of time. No greater an example of this can be found, than through Husqvarna outdoor power products.

Utilising the skills developed through manufacturing different products was a key force in the development of Husqvarna's first chainsaw. With existing chainsaws at the time causing problems with noise pollution, the brands experience in motorcycle manufacturing provided the 'know how' for ground breaking innovation. Through the use of in house built muffler technology, the noise level of the first Husqvarna 90 chainsaw was cut down to half that of contemporary competition.

Throughout the years, Husqvarna has proved its technological leadership through the introduction of ground-breaking and award winning solutions and products, with a strong user focus.

Today, Husqvarna products are hard at work in parks, forests and gardens around the world, making both home owners and professionals ready to perform.
